Results-driven Chemical Engineer with 6+ years of progressive experience in high-volume FMCG manufacturing and supply chain operations, specializing in quality assurance, operations coordination, and compliance management. Proven track record of reducing product rejects, optimizing processes, maintaining audit compliance, and leading cross-functional teams through successful line rehabilitation and commissioning. Strong foundation in ISO/QMS, HACCP, GMP, and CAPA/RCA methodologies with hands-on experience in procurement, inventory optimization, and vendor management. Combines technical QA/QC expertise with strong operational coordination skills to drive efficiency, ensure regulatory compliance, and deliver cost-effective solutions. Analytical, self-directed, and comfortable in fast-paced, evolving environments. Ready to contribute immediately.

CORE COMPETENCIES

Quality & Compliance: ISO 9001 / QMS, HACCP / Food Safety, GMP Audits, CAPA & Root Cause Analysis, WI and SOP Development, Equipment Calibration, Traceability, Document Management

Operations & Coordination: Cross-functional Collaboration, Team Training & Leadership, Workflow Planning, Project Coordination, Multi-Stakeholder Follow-through, Production Line Management, Training & Certification, Third-Party Services Coordination

Supply Chain & Procurement: Supplier / Vendor Management, Inventory Optimization, Purchase Requisition to Receipt, Budget Forecasting, Cost Reduction, Supplier Performance Evaluation

Technical Tools: Microsoft Office (Excel, Word, Powerpoint), Power BI, SPC Toolkit, SAP, AI Automation, SQL

WORK EXPERIENCE

COCA-COLA BEVERAGES PHILIPPINES, INC. | JULY 2015- NOVEMBER 2021

Product / Line QA Analyst

- Monitored and maintained production line parameters and quality standards throughout operations; made real-time process adjustments to optimize yield and meet output targets / KPIs
- Conducted quality testing in WIP and finished products, ensuring compliance with established specifications, regulatory standards and ISO/QMS requirements
- Performed process capability studies and data analysis for continuous improvement, implementing corrective actions that reduced rejects and improved yield
- Applied problem-solving methodologies (Root Cause Analysis, Fishbone Diagram, 5 Whys, PDCA) to investigate non-conformances, drive corrective actions and prevent recurrences
- Conducted daily GMP and line audits to ensure compliance with food safety, hygiene, and operational standards; documented findings and recommended corrective actions
- Trained and certified production line personnel on inspection procedures for oPRP and CCP areas, ensuring team competency and compliance with food safety requirements
- Served as QA Lead for the full rehabilitation and process validation of Production Line 2, coordinating across production, process, engineering, and logistics from planning through commissioning

Process QA Analyst

- Managed the comprehensive testing of components used in syrup preparation and testing of incoming raw materials (new bottles, sugar, CO2, caps / crowns) ensuring supplier deliveries met specifications prior to production release
- Evaluated and monitored critical parameters in water treatment and waste water plant to maintain regulatory and internal compliance
- Enforced and supervised cleaning and sanitation of process equipment to support food hygiene and safety standards across all facilities

Calibration Chairman

- Handled calibration and preventive maintenance of equipment, managed schedules, coordinated with third-party service providers and maintained calibration records, documents and service reports

- Coached and assisted process owners in the verification of pressure gauges and thermometers of production lines, water treatment, cold room and other critical areas
- Facilitated annual refresher training for the plant's calibration team using SOPs and work instructions, ensuring team competency and audit readiness
- Conducted thorough assessments of third-party services and generated certificates of completion for goods receipt processing and invoicing

Inventory / Procurement

- Tracked and maintained optimal levels of chemicals and lab supplies
- Handled annual budget forecasts, monitored supplier performance, and managed documentation from purchase request through goods receipt to support audit-ready records
- Scheduled purchase requisitions for supplies and external services to optimize supply usage and minimize delivery / service costs in close coordination with procurement team and vendors
- Built strong relationships with suppliers, vendors and third-party service providers fostering a mutually beneficial and reliable network

MAJESTIC PRESS, INC. | MARCH 2015 - MAY 2015

Quality Control Inspector

- Conducted inspection, sampling, and testing of incoming raw materials (paints/dyes, paper) for client packaging production, verifying that all materials aligned with prescribed client specifications
- Reviewed packaging design blueprints and printing plates for correctness, completeness, and compliance before each production run
- Performed visual quality checks on finished goods, confirming quality standards were met prior release

BAGUIO PESTICIDE ANALYTICAL LABORATORY | APRIL 2013 - MAY 2013

On-The-Job Trainee

- Conducted pesticide extraction and analysis on farm produced fruits and vegetables to identify if trace chemicals are still present and safe for consumption

OTHER EXPERIENCE

Professional Development & Independent Projects | 2022 – Present

- Developed and published 4 full-stack web apps and operations toolkits as personal productivity projects
- Self-directed upskilling in data analysis (MS Excel, Power BI, SQL), SAP modules and AI-Automation (reporting workflows, analytics, draft process documentation)
- Operated small food business (hot sauce, chili paste, coffee beans) and preloved sportswear resale (2024); handled sourcing, production, sales, delivery and customer service
- Applied data analysis and risk management in trading stocks and other financial instrument
- Currently deepening knowledge in procurement, supply chain management, production planning, and ISO quality systems to complement hands-on technical experience

EDUCATION & LICENSE

Bachelor of Science in Chemical Engineering – Saint Louis University, Baguio City (2009–2014)

Licensed Chemical Engineer – Professional Regulation Commission (Nov. 2014)

TRAINING AND SEMINARS

-
- | | |
|--------------------------------------|--|
| • Operations Management | • Managing Effective Calibration Program |
| • Food Safety & HACCP | • Advanced Microsoft Excel |
| • Good Manufacturing Practices (GMP) | • Chemical Spill Management |
| • Statistical Process Control (SPC) | • Ingredients Handling and Storage |
| • 5S & Root Cause Analysis | • Basic Life Support & First Aid |
| • Problem Solving Process | |
