Highly skilled and adaptable Chemical Engineer with 6+ years of experience managing multi-step workflows, cross-functional coordination, documentation compliance, and vendor relationships. Leverages a strong foundation in production processes, quality assurance and control, supply chain operations, problem-solving, procurement, inventory management and data analysis. Skilled in planning and tracking processes from initiation to completion, following up across stakeholders, and driving on-time execution. Analytical, self-directed, and comfortable in fast-paced, evolving environments. Ready to contribute immediately.

CORE COMPETENCIES

Operations & Coordination: Workflow management, cross-functional collaboration (QA, production, logistics, procurement, engineering), vendor/supplier/third-party service coordination, purchase requisition to goods receipt documentation, multi-tasking with minimal supervision

Quality & Compliance: ISO, QMS, food safety, HACCP, management systems, GMP audits, CAPA, SOPs, traceability, equipment calibration and verification, audit-ready record keeping, data management

Testing & Evaluation: Physico-chemical testing and evaluation, standardized quality inspection, process capability studies, problem-solving methodologies (Root Cause Analysis, Fishbone Diagram, PDCA, and others)

Procurement & Inventory: Budget forecasting, supply tracking, purchase scheduling, supplier relationship management, goods receipt and invoice processing

Software & Tools: Microsoft Office (Word, Excel, PowerPoint), SAP, data analysis tools (SPC toolkit), AI tools

Soft Skills: Strong communication, organization, time management, resourcefulness, flexibility, follow-up discipline, calm under pressure, team player

WORK EXPERIENCE

COCA-COLA BEVERAGES PHILIPPINES, INC. | JULY 2015- NOVEMBER 2021

Product / Line QA Analyst

- Monitored and maintained production line parameters and quality standards throughout operations; made real-time process adjustments to optimize yield and meet output targets / KPIs
- Conducted quality testing in WIP and finished products, ensuring compliance with established specifications, regulatory standards and ISO/QMS requirements
- Performed process capability studies and data analysis for continuous improvement, implementing corrective actions that reduced rejects and improved yield
- Applied problem-solving methodologies (Root Cause Analysis, Fishbone Diagram, 5 Whys, PDCA) to investigate non-conformances, drive corrective actions and prevent recurrences
- Conducted daily GMP and line audits to ensure compliance with food safety, hygiene, and operational standards; documented findings and recommended corrective actions
- Trained and certified production line personnel on inspection procedures for oPRP and CCP areas, ensuring team competency and compliance with food safety requirements
- Served as QA Lead for the full rehabilitation and process validation of Production Line 2, coordinating across production, process, engineering, and logistics from planning through commissioning

Process QA Analyst

- Managed the comprehensive testing of components used in syrup preparation and testing of incoming raw materials (new bottles, sugar, CO₂, caps / crowns) ensuring supplier deliveries met specifications prior to production release
- Evaluated and monitored critical parameters in water treatment and waste water plant to maintain regulatory and internal compliance
- Enforced and supervised cleaning and sanitation of process equipment to support food hygiene and safety standards across all facilities

****Calibration Chairman**

- Handled calibration and preventive maintenance of equipment, managed schedules, coordinated with third-party service providers and maintained calibration records, documents and service reports
- Coached and assisted process owners in the verification of pressure gauges and thermometers of production lines, water treatment, cold room and other critical areas
- Facilitated annual refresher training for the plant's calibration team using SOPs and work instructions, ensuring team competency and audit readiness
- Conducted thorough assessments of third-party services and generated certificates of completion for goods receipt processing and invoicing

****Inventory / Procurement**

- Tracked and maintained optimal levels of chemicals and lab supplies
- Handled annual budget forecasts, monitored supplier performance, and managed documentation from purchase request through goods receipt to support audit-ready records
- Scheduled purchase requisitions for supplies and external services to optimize supply usage and minimize delivery / service costs in close coordination with procurement team and vendors
- Built strong relationships with suppliers, vendors and third-party service providers fostering a mutually beneficial and reliable network

MAJESTIC PRESS, INC. | MARCH 2015 - MAY 2015

Quality Control Inspector

- Conducted inspection, sampling, and testing of incoming raw materials (paints/dyes, paper) for client packaging production, verifying that all materials aligned with prescribed client specifications
- Reviewed packaging design blueprints and printing plates for correctness, completeness, and compliance before each production run
- Performed visual quality checks on print samples to confirm they matched quality standards and were approved for release

BAGUIO PESTICIDE ANALYTICAL LABORATORY | APRIL 2013 - MAY 2013

On-The-Job Trainee

- Conducted pesticide extraction and analysis on farm produced fruits and vegetables to identify if trace chemicals are still present and safe for consumption

OTHER EXPERIENCE

Professional Development & Entrepreneurial Venture | 2022 – Present

- Developed and published 4 full-stack web apps and operations toolkits as personal productivity projects
- Self-directed upskilling in data analysis (MS Excel, Power BI, SQL), SAP modules and AI-Automation (reporting workflows, analytics, draft process documentation)
- Operated small food business (hot sauce, chili paste, coffee beans) and resale of preloved sportswear (2024); handled sourcing, production, sales, delivery and customer service
- Applied data analysis and risk management in trading stocks and other financial instrument
- Currently deepening knowledge in procurement, supply chain management, production planning, and ISO quality systems to complement hands-on technical experience

EDUCATION & LICENSE

Bachelor of Science in Chemical Engineering – Saint Louis University, Baguio City (2009–2014)

Licensed Chemical Engineer – Professional Regulation Commission (Nov. 2024)

TRAINING AND SEMINARS

-
- | | |
|--------------------------------------|--|
| • Operations Management | • Managing Effective Calibration Program |
| • Food Safety & HACCP | • Advanced Microsoft Excel |
| • Good Manufacturing Practices (GMP) | • Chemical Spill Management |
| • Statistical Process Control (SPC) | • Ingredients Handling and Storage |
| • 5S & Root Cause Analysis | • Basic Life Support & First Aid |
| • Problem Solving Process | |
